# VIRUS

Plant viruses, like other viruses, contain a core of either DNA or RNA. As plant viruses have a cell wall to protect their cells. Plant viruses can be transmitted by a variety of vectors through contact with an infected plant's sap, by living organisms such as insects and nematodes, and through pollen.

**Vector :** Sucking pest such as White Fly

Basically nutrition deficiency makes plant immune system weaker that causes virus affected diseases as like Yellow Yein Mosaic Virus (YMV) in papaya, Okra (Bhindi). Leaf Curl Virus in Chilli, Tomoto , etc. Tobacco Mosaic Virus (TMV) in Tobacco.

# VIRUS

**LEAF CURL VIRUS**

**YELLOW VEIN MOSAIC VIRUS**

# SOLUTION FOR VIRUS

**REVIVE** is organic plant extract based formulation, specially designed to protect plant and increase immunity power of the plant. Antiviral activity of REVIVE has been studied in different plant virus system. It suppresses and slow down the systemic infection of virus.

**CONTENT :** Plant root and leaves extracts from wild species like *mirabilis jalapa*, *b.diffusa*, etc.

**DOSE:** 50 ml in 15 LTR of water

**100% ORGANIC PRODUCT**

**CONTROL**

**TREATED**
